

YFB—实体套圈滚针轴承是一种断面高度小承载能力高的轴承。由于外圈硬度高，即使是轻合金轴承座，也可以应用自如。这种轴承可提供公制及英制二个系列的产品，稳中有降系列都有带保持架、满针型及密封型三种结构。此外，实体套圈滚针轴承可分带内圈或不带内圈二种，不带内圈者以心轴作为滚道面，使体积变得更小。

YFB machine type needle roller bearing is a kind of high capacity bearing with small sectional height. It can operate very flexibly even with the light alloy bearing seat due to its high hard outer ring. There are two series: metric and inch series. Both of which are structured with retainer, full needle and sealing types. Besides, the machine type needle roller bearings are divided into two kind: that with inner ring and without ring. The center shaft is used as rolling body tray for those without inner ring so that its size is even smaller.

结 构 Structure

NK	轻系列无内圈滚针轴承	Light series needle roller bearings without inner ring
NKS	重系列无内圈滚针轴承	Heavy series needle roller bearings without inner ring
RNA49	无内圈滚针轴承	Needle roller bearings without inner ring
RNA69	双列无内圈滚针轴承	Double rows needle roller bearings without inner ring
RNA48	无内圈滚针轴承	Needle roller bearings without inner ring
NKI	轻系列带内圈滚针轴承	Light series needle roller bearings with inner ring
NKIS	重系列带内圈滚针轴承	Heavy series needle roller bearings with inner ring
Na49	带内圈滚针轴承	Needle roller bearings with inner ring
Na69	双列带内圈滚针轴承	Double rows needle roller bearings with inner ring
Na48	带内圈滚针轴承	Needle roller bearings with inner ring
RNA49...RS	单面密封无内圈滚针轴承	Single sealed needle roller bearings without inner ring
RNA49...2RS	双面密封无内圈滚针轴承	Double sealed needle roller bearings without inner ring
NA49...RS	单面密封带内圈滚针轴承	Single sealed needle roller bearings with inner ring
NA49...2RS	双面密封带内圈滚针轴承	Double sealed needle roller bearings with inner ring
IR	内圈系列	Inner ring series
BR,BRI	英制系列带内圈滚针轴承	Inch system series needle roller bearings with inner ring
